BOOK III
ON GOING ACTIONS WHICH RELATE TO OPERATION
STEADFAST

BOOK III, VOL A, CHAP 3 (DCSPER)

1. CIVILIAN PERSONNEL MANAGEMENT.

a. The procedures governing the management of those civilian personnel involved in the reorganization will be developed to minimize turbulence and provide the greatest opportunity for continued employment. Implementing plans for the assignment of civilian personnel in the commands will be coordinated with DA, DCSPER-OCF and with the US Civil Service Commission. The notification of labor unions at the national level will be accomplished by DA, notification at local levels will be by local commands and will follow the national notification.

b. It is envisioned that civilian positions will be established at grade levels which reflect the application of sound position management principles and support the objective of maintaining the grade structure at the lowest possible level. All affected employees will be counseled concerning their rights and entitlements evolving from the reorganization. Employees will also be registered in the DOD Priority Placement Program as appropriate. Minority group employees will be offered continued employment equally with all employees. Additionally, full consideration will be given to the adequacy of housing and facilities at employment locations.

c. Information packets will be developed in coordination with Real Estate Associations and appropriate Chambers of Commerce. These packets will include information concerning housing, schools and area orientation in new employment locations.

d. A synopsis of the tentative plan for the management of civilian personnel is attached at III-A-5. The turbulence report required by PMR guidance dated 15 June 72 and is attached at pages III-A-7 to III-A-12. These represent the best estimates available at this time and will be continually revised during the entire reorganization.

III-A-4
~~FOR OFFICIAL USE ONLY~~

~~CLOSE HOLD~~

~~CLOSE HOLD~~

BOOK III, VOL A, CHAP 3 (DCSPER)

1. Initially TDA's indicating job titles, series and grades will be established for TRADOC, FORCOM and the remaining CONUS Armies and their support elements. Following approval of the TDA's by DA, civilian position descriptions will be developed and graded and will constitute the basis for job offers emanating from the reorganization. Upon approval, it is recommended that these TDA's remain firm for a period of one year following the completion of the reorganization to provide a reasonable period of employment stability.
2. The headquarters and support elements of CONARC and the headquarters and support elements of Third, Fifth and Sixth Armies will be placed in separate competitive levels for reduction-in-force purposes. Currently those activities are in the same competitive level with the garrisons which provide them support. First Army is already in a separate competitive area from the garrison at Fort Meade. This action will lessen personnel turbulence and insure the continuing efficiency of the garrison operation.
3. Those employees identified with missions that transfer from DCSIT to TRADOC and from DCSOPS to FORCOM and from CDC to TRADOC may be offered rights to transfer with their function. Additionally, persons identified with the Reserve mission at Third Army headquarters will be offered rights to transfer with their function to positions in the new First Army headquarters and will compete with all current Headquarters, First Army employees for these positions.
4. Current employees of First, Fifth and Sixth Armies will compete, under reduction-in-force procedures, for those positions in their competitive areas, which will be established under the new CONUS Army structure. Employees excess to the needs of those Armies will be considered under the procedures outlined below.
5. All employees surplus to the needs of the CONUS Armies or not transferred with functions as discussed in paragraph 3, and the surplus employees of CDC, will become part of a labor pool and will be offered opportunities to fill the vacant positions in TRADOC, FORCOM and those remaining in the new CONUS Armies. Employment offers will be made in reverse retention order.
6. In order to minimize attrition and prevent deterioration of employee morale, firm job offers will be made as soon as possible following public announcement of the reorganization. Once made and accepted, job offers will not be changed unless mutually agreed upon by management and the employee. In this connection, where the job offers are equal, management, in order to avoid undue turbulence

~~CLOSE HOLD~~

~~CLOSE HOLD~~

BOOK III, VOL A, CHAP 3 (DCSPER)

and expense, will retain the right to determine the command to which the employee will receive an offer.

7. Close coordination will be maintained through the operating Civilian Personnel Offices with command establishing new organizations in geographic areas affected by the CONARC reorganization. Excess employees will be given appropriate consideration for vacant positions in those organizations.

1. COUNTERINTELLIGENCE & SECURITY SERVICES.

a. Effective 1 October 1972, the Defense Investigative Service (DIS) was established to assume the personnel security investigative responsibility presently assigned to the US Army Intelligence Command (USAINTC). Unresolved at present is the exact organization of the agency which will be responsible for providing requisite counter-intelligence support, less personnel security investigations, to HQ TRADOC and FORCOM and their subordinate installations, units, and activities. Action agency to resolve this issue is ACSI, DA.

b. This action impacts on both TRADOC and FORCOM.

c. Points of Contact:

- (1) ACSI, DA - LTC Bartron/71862
- (2) DCSI, CONARC - LTC Boyer/3608

3. ROTC INFORMATION SYSTEM (ROTCIS).

a. SYNOPSIS OF ACTION. Department of Army approved project to establish an ROTC Information System in December 1970 (4th Indorsement dated 11 December 1969 to letter, HQ DA, CSAVCS-MA, 4 December 1970, subject: Management of the US Army Reserve Officer Training Corps (ROTC) Program. Department of the Army provided no funds. Funding has been provided from CONARC resources. The concept of the ROTCIS is to provide necessary management data based upon a central data file established at HQ CONARC. Phase I of three phases was programed for implementation first quarter FY 73. Certain elements which comprise the ROTCIS have been put into operation, such as Camp Evaluation, Directory, and Scholarship programs. At the current time, the project is approximately 25% completed. ROTCIS project programing has been delayed because of priority actions taking precedence. Project planning for Phase I will restart in second quarter FY 73 with implementation expected in fourth quarter FY 73. Milestones for Phases II and III are not available.

b. RELATIONSHIP TO REORGANIZATION BY COMMAND. The project system has and is being developed by HQ CONARC. Primary responsibility for the project and function will be transferred to HQ Force Command.

c. POINTS OF CONTACT. (Officer/Telephone)

(1) ROTC Directorate - LTC C. F. Dickerson, extension 2019.

(2) Dir, Management Information Systems - COL J. F. Shillingburg, extension 2956.

4. OTHER CONSOLIDATION PLANS.

a. Current CONARC plans call for consolidation of CSEW school missions into USAINTS and CGSC with certain ground surveillance equipment maintenance instruction being assigned to other CONARC schools with electronic capability.

b. POINT OF CONTACT. Operation STEADFAST, LTC Palmieri/4440.

COMMENTS FOR BOOK III

1. Reference: Letter, DACS-MR, subject: ROTC Management Guidance Supplement, dated 10 Oct 72.

2. Specific reference is made to paragraph 6 of Ref Para 1, above. Paragraph 6 necessitates an extensive review and the development of a systems impact position for incorporation in the Detailed Plan due DA 20 Oct 72. Due to a total void in guidance in areas addressed by DA questions, initiation of such a systems review cannot begin until some parameters are prescribed. Some of these voids include:

a. Reference Para 6a: The type of ADP ROTC Regional Headquarters Support to be furnished these headquarters by Forts Knox, Bragg, Riley and Lewis must be identified before the ADP capability to handle such requirements can be evaluated. Decision on these ADP support requirements cannot be finalized in time to permit a systems impact review for the 20 Oct submission.

b. Reference Para 6b, c, d, and e: Currently, DA approved CONARC SAILS (BASOPS) Satellization Plan provides that Logistical ADP support and related financial support be furnished ROTC units from the nearest BASOPS installation. Likewise, DA DCSPER philosophy for SIDPERS places personnel support on the SIDPERS installation nearest the man. The current SAILS satellization plan has been developed and submitted under these guidelines. Regionalized ADP support in the personnel, logistical and financial areas divorce the man from his records by hundreds of miles, in some cases. Regionalized logistical support under the current version of SAILS does not appear feasible for consideration. Therefore, prior to studying the feasibility of a regional ADP support concept, DA DCSPER and DCSLOG should provide the STEADFAST Steering Group specific guidance in the areas of whether the philosophy of a regional headquarters satellization plan is in line with the DA approach to provide responsive ADP support. It is requested that any system limitations which would be created by this concept also be identified. Based on receipt of this DA guidance, the appropriate action will be initiated.

c. Reference Para 6f and g: No comment.

3. The date for submission of this portion of the Detailed Plan is unknown.

4. Point of contact: LTC Dickerson, Autovon 680/2019.

~~CLOSE HOLD~~

BOOK III, VOL A, CHAP 5 (DCSIT)

5. SAFEGUARD.

a. The sensitivity of the SAFEGUARD mission precludes a division of functions between FORCOM and TRADOC at this time. However, subsequent plans will address each command's responsibilities as follows:

(1) FORCOM

(a) Provide, in coordination with CG, SAFSCOM, administrative support services to CONUS sites in accordance with the requirements contained in individual site activation plans.

(b) Prepare and coordinate the administrative support services and non-tactical logistical support aspects of the Integrated Logistic Support Plan for the SAFEGUARD System, and provide non-tactical support to CONUS sites in accordance with that plan. Provide civilian personnel services under a cross-servicing agreement when requested by CG ARADCOM.

(c) Establish, staff and train the necessary FORCOM organizational elements to accomplish non-tactical logistical, and administrative support to SAFEGUARD tactical sites, and coordinate on-site manpower and equipment requirements covering this support with CG, ARADCOM.

(2) TRADOC

(a) Prepare, consolidate, coordinate, publish, maintain and monitor the execution of the SAFEGUARD Integrated Training Plan in conjunction with appropriate participating organizations.

(b) Formulate and accomplish the resident training program. Recommend for procurement the required training equipment, aids and devices to support the resident training program. Establish and operate the SAFEGUARD Central Training Facility.

(c) Prepare the applicatory type literature of the SAFEGUARD portion of the Army-wide Training Literature program.

(d) Prepare and coordinate the SAFEGUARD Qualitative and Quantitative Personnel Requirements Information (QQPRI) for submission to the System Manager.

(e) Prepare, coordinate, publish and distribute SAFEGUARD System Training Device Requirements (TDR).

~~CLOSE HOLD~~

~~CLOSE HOLD~~

BOOK III, VOL A, CHAP 5 (DCSIT)

(f) Provide chairmanship and secretariat for the SAFEGUARD Training Committee (STC) which is established to coordinate the total SAFEGUARD training effort and to advise the System Manager on all SAFEGUARD Training matters.

(g) Participate in all nuclear activities pertaining to the SAFEGUARD System and prepare warhead MCs and QMRs, stockpile-to-target sequence, and related nuclear documentation.

(h) Provide advice and assistance with regard to SAFEGUARD doctrine, as requested, including electronic warfare, and coordinate with CG, ARADCOM other Army doctrine matters which may impact upon the SAFEGUARD System.

(i) Provide assistance to CG, ARADCOM in the development of SAFEGUARD manning tables and equipment lists.

b. The SAFEGUARD System Master Plan tasks CG, CONARC, to provide medical support to SAFEGUARD sites. However, the creation of the Medical Command will make this a MEDCOM responsibility. Consequently, medical support to SAFEGUARD is not addressed in this plan.

c. POINT OF CONTACT. Operation STEADFAST, LTC Palmieri/4440.

BOOK III, VOL A CHAP 6 (DCSOPS)
CH 1

1. READINESS ASSISTANCE REGIONS.

a. There will be nine Readiness Assistance Regions (RAR) established as part of the CONUS Army Headquarters. There will be four RAR in First Army, three RAR in Fifth Army and two RAR in Sixth Army.

b. Each region will be commanded by an Active Army Major General. The mission of the RAR will be to assist Reserve Component commanders, identify readiness deficiencies and help determine the most effective resource, Reserve or Active Army, to correct the deficiency. The RAR headquarters will consist of approximately 30 personnel (a command section, administrative section and operations section and readiness coordinators).

c. There will be dedicated advisors at the ARCOM, GOCOM, State AG division and brigade levels. Certain battalions will have dedicated advisors.

d. The RAR commander will have under his command functional assistance teams, such as MAIT and administrative teams, who will visit both USAR and ARNG units to provide instruction and assistance in improving maintenance and administration.

e. The RAR commander will command a group of branch teams who will serve as evaluators and instructors to both USAR and ARNG units in the region. Especially on the USAR side, the branch teams will fill a need for wider expertise than the battalion advisor provides. Moreover, the teams will visit many small units and detachments that seldom see an advisor under the present system. The branch teams will report directly to the readiness coordinator in the RAR headquarters.

f. The RAR headquarters and branch team will be tailored to the Reserve Component structure in that region. The RAR and its subordinate teams will be located on or near an active military installation to the extent feasible.

2. The two existing Maneuver Area Commands will be given the primary mission of administering battalion and brigade FTX CONUS wide. One Basic Combat Training Brigade from each of seven training divisions will be converted into a MAC element designed to write and administer FTXs, CPXs and ATTs to units.

3. Training Divisions will be tasked to provide more assistance to USAR and NG units in basic MOS training. This should assist in reducing MOS imbalances.

~~CLOSE HOLD~~

BOOK III, VOL A CHAP 6 (DCSOPS)
CH 1

4. To the extent possible, each high priority Reserve Component unit will have an Active Army sponsor unit. As far as practical, units will be associated with geographically accessible Active Army units, preferably similar in mission. The sponsor unit will make itself available to the Reserve Component unit commander for discussion of mutual problem areas, advice and other assistance under the mutual support program. Active Army assistance may include such activities as mobile training teams, administrative and logistical assistance teams, and integrated FTX and CPXs.

5. Each Active Army installation with a mission to support Reserve Component training will establish a single point of contact, i.e., a Director for Reserve Component Unit Training Support.

6. Details for implementation of the management concept are being developed and will be submitted to PMR on 17 November 1972.

7. Point of Contact: LTC Codd, CONARC Operation STEADFAST 680-2735.

2. DMIS.

a. RESERVE FIELD PERSONNEL SYSTEM. The Reserve Field Personnel System is designed, developed and maintained by the US Army Administration Center, St. Louis, Missouri. The system is currently operational at each CONUSA Headquarters. Under the reorganization, this function will remain with the CONUSA Headquarters, with the associated data processing support assigned to the host installation.

(1) Three major impacts are unresolved by this action: First, ADPE cost factors assume phasing out the B-3500's at the CONUSA's, and are keyed to 2 Jul-Oct 73 phasing concept. The Personnel Phasing Plan eliminates the current B-3500 operational staff at the CONUSA's prior to 1 Feb 74. Second, the computer programs supporting the current reserve accounting system have to be converted to the installation equipment (IBM 360). Since the system is maintained by the US Army Administration Center, that organization must be tasked with the conversion effort. Conversion must be accomplished by Jun 73. Third, DA has developed the concept for the US Army Reserve Components Personnel Administrative Support and Reporting System (PERSARS); even an Aug 72 DA approval of the concept would not result in full implementation of the system until 1 Jul 74. DA should task the US Army Administration Center to provide an interim standard package pending the completion of the DA multi-command ADP system.

(2) The PERSARS Project and Operation STEADFAST will have mutual, significant impact. No decision should be made on the prototype test site until the milestone schedule of the Project Master Plan (PMP) for PERSARS has been integrated with the requirements of STEADFAST.

*b. Based on the guidance received by this headquarters on 19 Sep 72, it was indicated that the resolution of the above stated problem would be accomplished by RCPAC in accordance with guidance provided by DA.

7. INSPECTOR GENERAL.

a. NATIONAL CEMETERY INSPECTIONS.

(1) As per DA supplemental guidance, dated 10 November 1972, "Inspector General responsibilities for National Cemetery Inspections will be transferred to appropriate installation commanders under the Installation Area Support Concept". This proposal is not realistic as it would require additional funds and possibly additional personnel for installation IG as well as divide the inspectional responsibility of the National Cemetery System between TRADOC and FORSCOM.

(2) Currently First and Fifth Armies delegate some National Cemetery inspections to specific installation IG but Third and Sixth Armies inspect all of the National Cemeteries located in their geographic areas of responsibility with the exception of Puerto Rico. Installation inspections are delegated only to those installations where a cemetery is located in the vicinity of the inspecting installation. All other inspections are conducted by the Army Inspector General.

(3) The DA proposal would require the 74 cemeteries to be specifically identified as a responsibility of FORSCOM or TRADOC due to assignment of the cemetery inspection responsibility to either a FORSCOM or TRADOC installation IG.

(4) Nearly all of the National Cemeteries are located near a Reserve or National Guard unit and can be conveniently inspected by the CONUSA IG without additional personnel and funds to inspect the cemeteries. An informal study conducted by this office indicates that inspection of the cemeteries by the CONUSA IG would require only about 200 additional travel miles where as inspection by installation IG would require 8,700 additional travel miles. This proposal would also keep the responsibility for inspection of the National Cemetery System in one command channel, specifically FORSCOM.

(5) Another important point is the CONUSA will have only an inspectional responsibility and not an operational responsibility for the cemeteries. Cemetery inspections will not involve other staff agencies of the CONUSA and operational control of the National Cemeteries will remain the responsibility of the US Army Memorial Affairs Agency.

~~CLOSE HOLD~~

BOOK III, VOL A, CHAP 8 (SPECIAL STAFF)

8. SURGEON.

a. MEDICAL COMMAND.

(1) On 1 June 1972 the VCSA approved in concept and for planning a Medical Command. This major command will directly manage all Class I and Class II hospitals, MEDDACs and those activities which support medical functions on a regional basis. Included in regionalized medical support are all Veterinary Services, Regional Dental Activities, Area Medical Laboratories and AMEDD Procurement functions. Transfer of these space authorizations belong to CONARC must be made to the Medical Command. The Medical Command will become a direct resource manager for all medical support related functions.

(2) There remain unresolved issues concerning the proponentcy for medical training activities at Medical Field Service School, Army Institute of Nursing, Veterinary School, Medical Training Center, Medical Maintenance School and professional civilian schooling program for physicians, dentists, veterinarians, nurses and other allied scientists. HQ TRADOC's detailed plans include assumption of all medical schools. The impact of the VCSA's decision and related COA study recommendations on the Medical Command creates unresolved issues which must be planned as ongoing actions to the Detailed Plan.

(3) That portion of other staff sections' workload that supported the Surgeon's office will be subject to revision at a later date, e.g., Manpower Survey, IG, and DCSCOMPT functions. Impact is indeterminate at the time of submission of the Detailed Plan.

(4) Army Surgeon's functions and responsibilities which were to be transferred to FORCOM and TRADOC Surgeon's offices relating to management of installation MEDDACs and direct medical support must now be transferred to MEDCOM. The Detailed Plan reflects this transfer change.

CHAPTER 1 - COMBAT DEVELOPMENTS COMMAND

1. PROPOSED MODIFIED TABLES OF DISTRIBUTION.

a. For reasons of manpower accounting, Department of the Army required that draft Tables of Distribution (TDA) submitted in support of reorganization planning be temporarily "frozen" in order to develop accurate data bases. Subsequent to this freeze date, new organizational concepts have been developed which will enhance the operational capabilities of the DCS-CD. Additionally, some required adjustments in grade, MOS and job titles have been identified.

b. The proposed MTDA outlined in the following pages reflects the latest desired configuration of the DCS-CD. Total personnel spaces (288) have not been altered. However, there has been some trade off of officer for civilian and enlisted positions. This proposed MTDA should be used by planners as a basis for developing formal MTDA actions as a future date.

2. POINT OF CONTACT. LTC G. N. Dreybus, CDC FWD, 8-680-2933.
